✓	Robots.txt	Great, your website has a robots.txt file. File: http://tradfood.herokuapp.com/robots.txt
✗	Analytics	We didn't detect an analytics tool installed on this website

Should Fix

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 1 blocking CSS resources. This causes a delay in rendering your page.

Optimize images

Properly formatting and compressing images can save many bytes of data.

Consider Fixing

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

Passed Rules

Avoid landing page redirects

Your page has no redirects.

Reduce server response time

Your server responded quickly.

Minify CSS

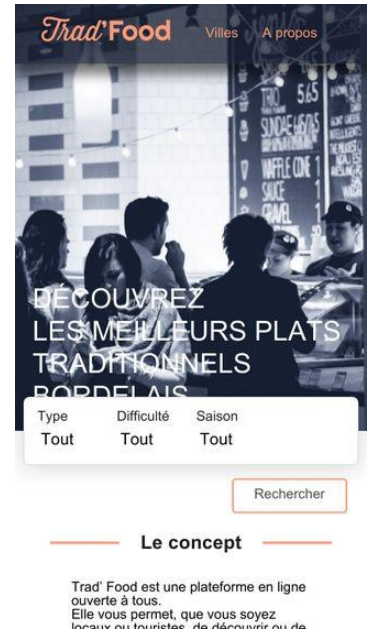

Your CSS is minified.

Minify JavaScript

Your JavaScript content is minified.

Prioritize visible content

You have the above-the-fold content properly prioritized.

**Passed Rules****Avoid plugins**

Your page does not appear to use plugins, which would prevent content from being usable on many platforms.

Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices.

Size content to viewport

The contents of your page fit within the viewport.

Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen.

Use legible font sizes

The text on your page is legible.
